Руководство по безопасному использованию батарееи

Warning:

- 1.The lithium polymer in the cell is an active substance, and incorrect use of the battery may cause fire, damage to the item, or personal injury.
- 2.The liquid inside the battery is highly corrosive. If there is a leak, do not approach it. If the internal liquid comes into contact with human skin or eyes, rinse immediately with clean water. If there is any adverse reaction, please go to the hospital immediately.
- 3.Do not allow the battery to come in contact with any liquid. Do not use the battery in rain or in humid environments. Decomposition reactions may occur after the battery is exposed to water, causing the battery to ignite or explode.
- 4.Lithium polymer batteries are sensitive to temperature. Be sure to store and store the battery within the permissible temperature range to ensure safe use and battery performance.

Check Before Charging:

- 1.Please check the appearance of the battery carefully. If the surface of the battery is damaged, bulging or leaking, do not charge it.
- 2.Check the charging cable, the appearance of the battery and other parts regularly. Never use a damaged charging cable.

01

5. 電池が長期停電，需將電池从飞行器内取出。

6. 電池若長期停電，請避免充電存放，建议充/放电至约 60% 电量时进行存储，有助于延长電池寿命。切勿空電存放，以免燒坏電池。

7. 勿將電池與導電物，手錶、金銀首飾或其他金屬飾物存放在一起或接觸存放。

8. 電池運送溫度範圍：23±5℃。

9. 若電池出現膨脹，应当立即停止使用，并按照當地要求回收處理。

10. 携帶電池登机时，請遵守当地机场相关要求。

11. 恶劣天气下，有可能会导致温度升高，请勿将電池长时间存放在车内，否则可能会造成電池起火或爆炸，造成人身伤害和财产损失。

回收与处理

请勿随意丢弃废旧電池，請將電池放电完毕并送至指定電池回收箱或回收站，并遵守当地法律法规及废旧電池回收处理的要求。

Battery Use Warning Caution 警告

如需更换非零等科技官方的電池会有爆炸

充電前的檢查

1. バッテリーの外觀をよく検査してください。バッテリーの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

2. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

3. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

4. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

5. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

6. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

7. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

8. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

9. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

10. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

11. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

12. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

13. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

14. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

15. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

16. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

17. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

18. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

19. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

20. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

21. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

22. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

23. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

24. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

25. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

26. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

27. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

28. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

29. バッテリーの充電ケーブルを確認し、充電ケーブルの表面に損傷、膨脹又は液漏れが確認できたら、充電してはなりません。

보안 및 운송

비행기 탑승 전/하강 시 누수 및 안전 문제로 인하여 항공에 보관하는 것을 금지합니다. 보관 시 안전 및 화재 위험을 방지하기 위해 기지 알람이 울리면 즉시 출하를 따라야 합니다.

3. Do not use non-ZeroZeroTech batteries. It is recommended to use ZeroZeroTech charging devices. The use of a solely responsible for the problems caused by the use of non-ZeroZeroTech official charging devices and batteries.

Cautions During Charging:

1. Do not charge a high temperature battery immediately after use, as this will cause serious damage to the battery. Charging a high temperature battery will trigger a high-temperature protection mechanism and lead to prolonged charging time.

2. If the battery power is extremely low, charge it within the allowed temperature range. If the battery power is too low and not charged in time, the battery will be over-discharged, which will cause damage to the battery.

3. Do not charge the battery in any environment that is close to or contains combustible or combustible materials.

4. Please pay attention to the battery status during charging to prevent accidents.

5. If the battery catches fire, immediately turn off the power and use sand or dry powder fire extinguisher to extinguish the fire. Do not use water to extinguish the battery.

6. Battery supports charging in temperatures between 5 °C and 40 °C. If the temperature is below 5 °C, the charging time is longer at normal temperatures (15 °C ~ 40 °C).

7. Check the charging cable and the battery life can be greatly extended.

Cautions During Use

1. Please only use the lithium polymer

2. Please only use the lithium polymer

64. Please only use the lithium polymer

1. Do not use non-ZeroZeroTech batteries. It is recommended to use ZeroZeroTech charging devices. The user is solely responsible for any consequences arising from the use of non-ZeroZeroTech official batteries.
2. Do not disassemble, impact or crush the battery in any way, or use it to do so, may result in damage to the battery, bulging, leakage, or even explosion.
3. If the battery is deformed, bulging, leaking, or has other obvious abnormalities (like swollen connector, etc.), stop using it immediately.
4. It is forbidden to short-circuit the battery.

5. Do not leave the battery in a high temperature environment above 60 °C. Otherwise the battery life will be shortened and battery may be damaged. Do not place the battery near water or fire.
6. Keep the battery out of the reach of children and pets.
7. The normal operating temperature range of the battery is 0 °C ~ 40 °C. Excessive temperatures can cause the battery to catch fire or even explode. Top too high temperatures can shorten the battery life. When the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

8. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

9. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

10. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

11. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

12. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

13. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

14. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

15. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

16. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

17. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

18. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

19. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

20. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

21. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

22. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

23. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

24. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

25. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

26. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

27. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

28. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

29. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

30. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

31. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

32. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

33. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

34. Please do not unload the battery when the drone is not turned off. Otherwise, videos or photos may be lost, and the power switch and the internal parts of the product may be damaged or damaged.

35. If the battery accidentally gets wet, immediately place it in a safe open area and stay away from the battery. If the battery temperature is outside the normal operating range, it cannot provide stable power output and the drone may not fly properly.

1. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

2. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

3. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

4. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

5. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

6. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

7. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

8. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

9. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

10. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

11. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

12. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

13. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

14. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

15. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

16. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

17. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

18. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

19. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

20. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

21. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

22. If the battery catches fire, do not use water to extinguish the fire. Please use sand or dry powder fire extinguisher to extinguish the fire.

- 23.
